

RECOGNITION OF QUALIFICATIONS IN THE REGION

(Cross-Recognition tool follow up)

SABINA ZAJC

ENIC-NARIC CENTER SLOVENIJA

ZAGREB, 6.11.2015

1. The idea and goal

- ▶ to make a mutual system-level based recognition tool in the Region,
- ▶ to map out if there are any general recognition problems among the countries in the Region and to detect possible future recognition obstacles,
- ▶ to have a recognition tool for faster and easier recognition procedures, for enhancing student mobility in the Region,
- ▶ **longterm goal**: mutual consensus between the countries in the Region, regarding the cross-recognition table; automatic recognition.

2. What have we done so far?

Creating a mutual cross-recognition table in two steps:

STEP 1 (completed) : every country had to list their national bologna and pre-bologna academic qualifications into the table

STEP 2 (not completed) : every country had to enter data in the table on how do they or how would they recognize academic qualifications from other countries in the Region (system-level based; by level, not as an equivalent)

3. Present time

- ▶ establish mutual understanding of cross-recognition project and table itself,
- ▶ reach agreement on the new table for cross-recognition,
- ▶ suggestions;

4. The future

- complete the table for the Region by next year's seminar

5. Issues to consider

- level of pre-bologna qualifications are not determined in the new bologna system in some countries (change of national legislation)

THANK YOU!
