agency for science and higher education croatia

Current good practices and upcoming initiatives in EBPM and data collection in the Croatian education system II. Mobile Team examples and experiences

mr. sc. Irena Petrušić, Davor Jurić, Igor Drvodelić, mr. sc. Sandra Bezjak

# Content

# **Agency for Science and Higher Education**

ENQA, EQAR, ECA, INQAAHE, CEENQA membership

□National accreditation body

□Evaluation procedures

□ Research and development activities

# **Activities**

**QA** Role

□Collecting and analysing data on the system of Science and HE

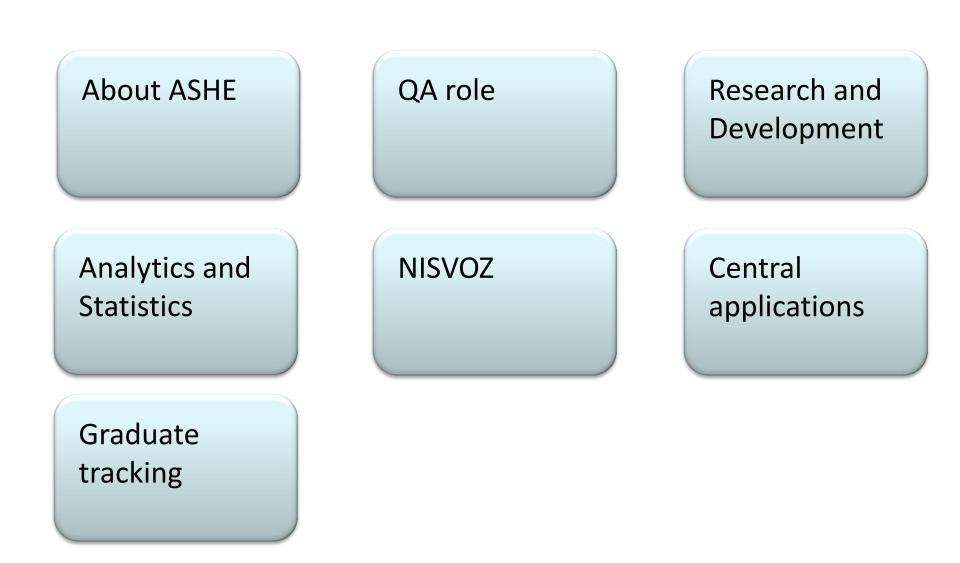

□National ENIC/NARIC Office

Central Applications Office

□Support to work of various bodies

□International cooperation

# **Evaluation in Science**

Accreditation

Reaccreditation

Thematic evaluation

- System wide analysis published on ASHE web
- Evaluation and development of QA procedures
- Some policy recommendations

# **Evaluation in Higher Education**

Accreditation

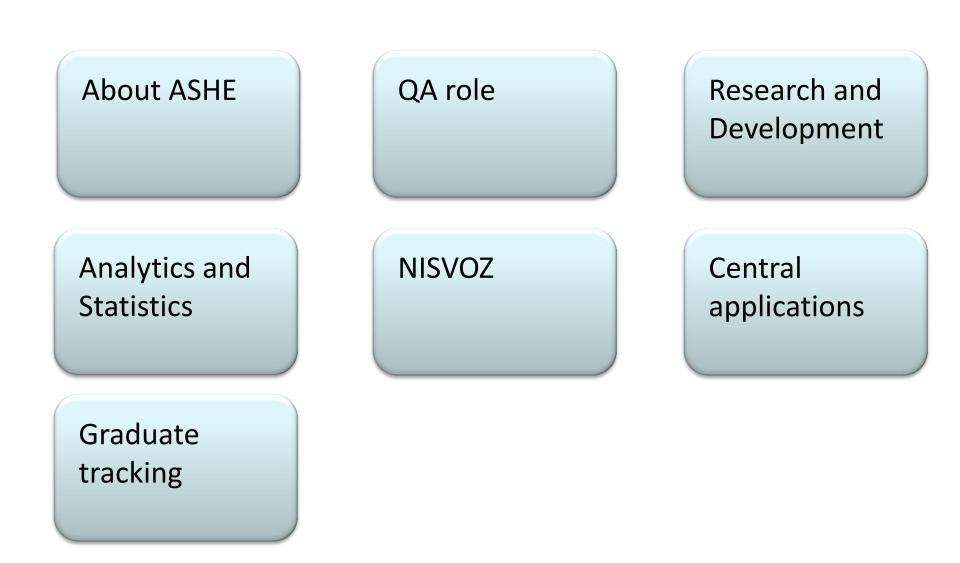

□ Reaccreditation – criteria relevant for employment

Thematic evaluation

After each procedure:

- System wide analysis published on ASHE web
- Data analysis + policy recommendation

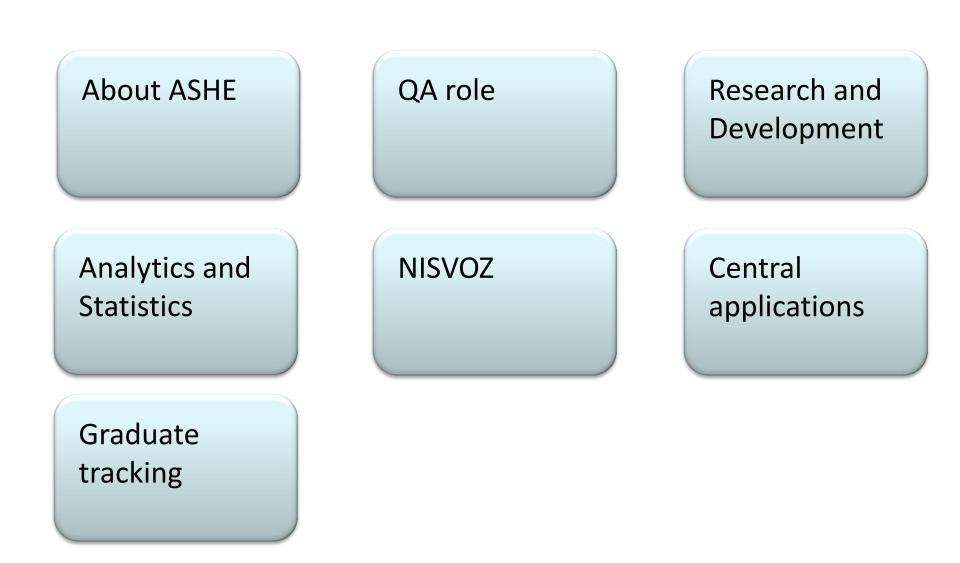

# **Research & Development**

□ Statistical data provided by HEIs analysis

□ ASHE: Study on impact of QA procedures on HE and science sector

# **Analytics and Statistics**

Collecting and analysing data on the systems of science and higher education"

□ Statistics on HEIs, study programmes, number of students

Data from Mozvag System (study programmes, HEIs) and MSES Registry of student numbers

Published on Agency's website

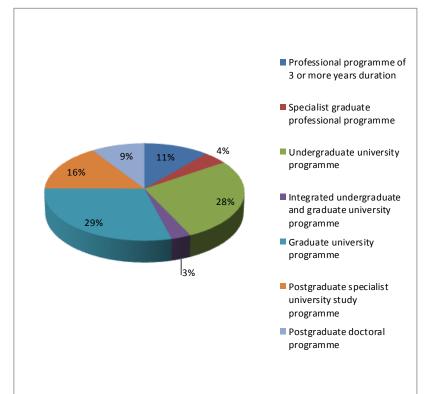

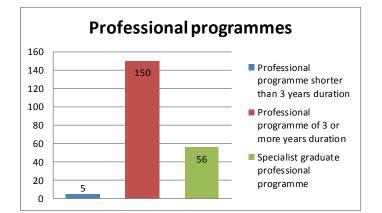

R-001

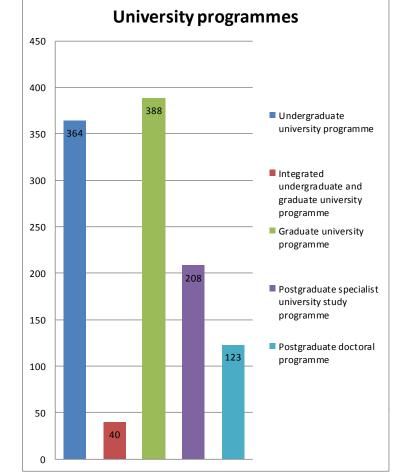

## Structure of university and professional programmes by type/level - 2012/13

| Professional study programmes by type/level          | Number            |
|--|-------------------|
| Professional programme shorter than 3 years duration | 5                 |
| Professional programme of 3 or more years duration   | 150               |
| Specialist graduate professional programme           | 56 <mark>.</mark> |

| University study programmes by type/level                  | Number |
|--|--------|
| Undergraduate university programme                         | 364    |
| Integrated undergraduate and graduate university programme | 40     |
| Graduate university programme                              | 388    |
| Postgraduate specialist university study programme         | 208    |
| Postgraduate doctoral programme                            | 123    |

# **Analytics and Statistics**

Directory of Study Programmes - the aim of the Directory is to provide information regarding accredited study programmes and Croatian HEIs

Provides information on study programmes, institutions delivering the programmes, field of study, location, ECTS and duration of study

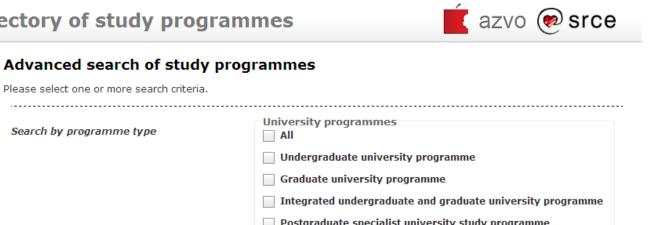

Search by multiple criteria enabled

# IPA 2007-2013

Development of National Information System for Science and Higher Education (NISSHE) - NISVOZ

 Rationale: Integration of different, dispersed information, databases and IS in the system of higher education and science: ISVU, MOZVAG, NISpVU, Official Registers at MSES, ISSP...

Providing integrated IS as a tool for analysis, reliable statistics and evidence based policy making

# **Preparation and documentation**

Consultations with stakeholders

Terms of Reference

Functional Specifications

- Registers
- Data Warehouse
- short description of existing information systems

Contractor is to develop System Design Document in Inception Phase

# **Envisaged results**

1. Development and implementation of the NISSHE components

1.1. NISSHE registers and data warehouse developed and implemented

1.2. The system tested and implemented

2. Integration of the existing higher education and science information systems and databases

3. Making NISSHE available to users and training them in using it

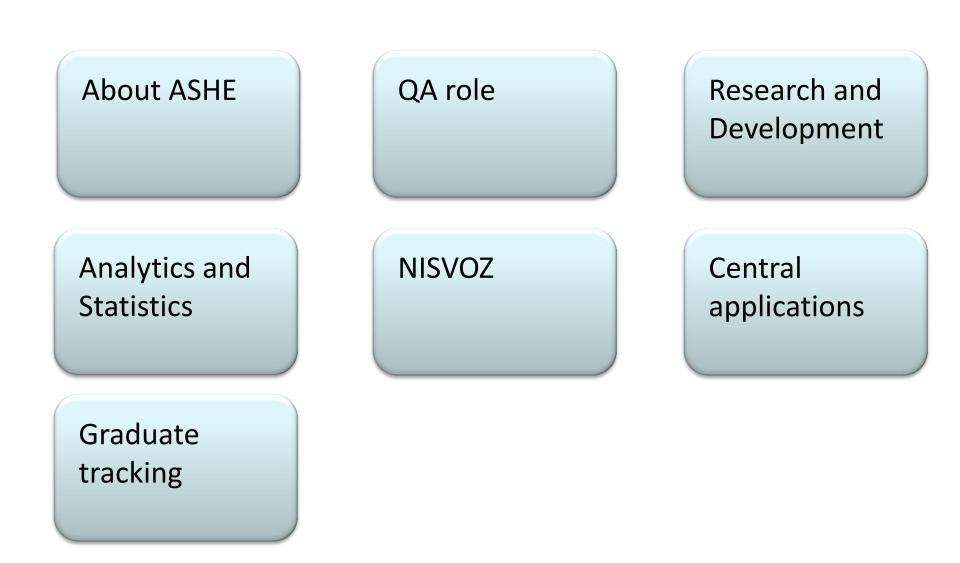

# Examples of analyses and quality indicators in NISVOZ/NISSHE

- □ average length of study and graduation rate
- □ student/teacher ratios by HEI types, scientific fields etc.
- analysis of the distribution of the students admitted and correlation with the total cost and length of study
- analysis of completion rate by various criteria: study programme, institution, scientific field, academic degree of teachers
- citation in journals of respective scientific areas/fields
   analysis of teaching and research staff by the area, field and branch of science/art;

etc.

# **Central Applications Office**

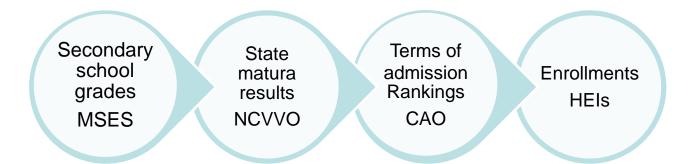

Central place for applications to all undergraduate, integrated and professional study programs

Data on all pupils who finished four-year long high school and on other candidates (personal data, grades, state matura results, desired study programs, position in rankings, etc.)

Data on study programs (terms of admission, enrolment quotas, profile of enrolled students, etc.)

## **Data collection and stakeholders**

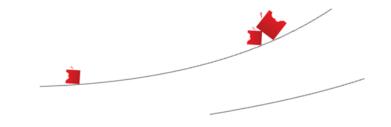

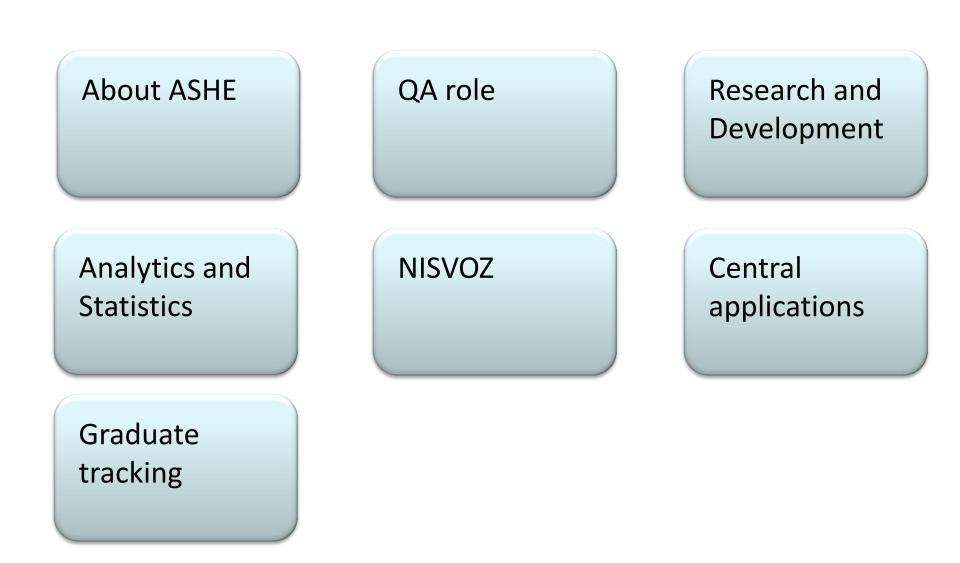

# Analysis

□ Statistical data available to all higher education institutions

Analysis of enrolment to study programs presented to MSES, NCVVO, to the Croatian Council of Universities and University Colleges of Applied Science, and to the universities

Delivery of publication based on independent analyses

# Who joins the labor market after finished high school?

96% pupils of high schools (lasting four years) want to enrolled at a HEI

□ 97.5 % grammar school pupils get enrolled to study programs

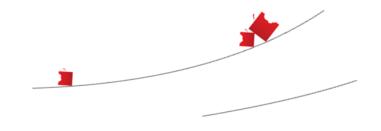

□ 66% pupils of vocational schools (lasting four years) get enrolled to study programs

# **Reaccreditation findings**

Criteria for reaccreditation of HEIs (Criteria 3.6.):

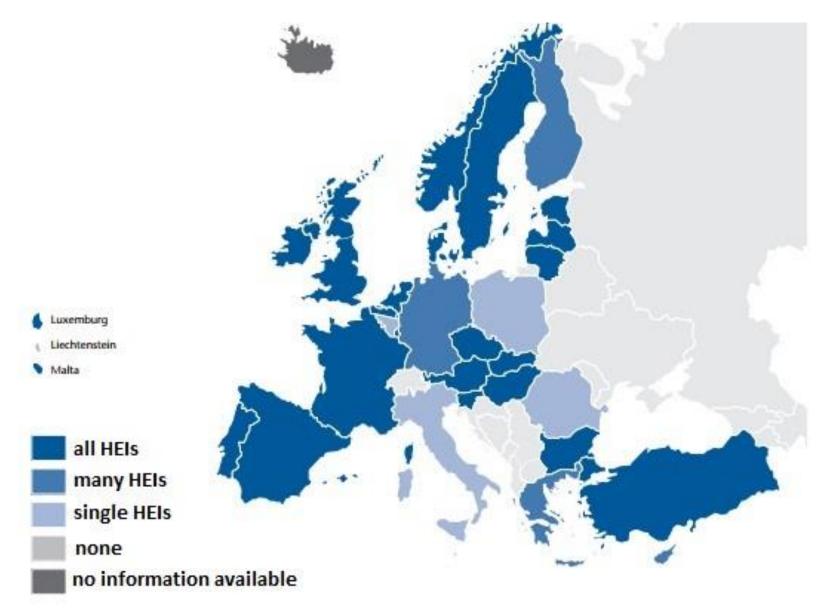

The institution maintains contact with alumni and keeps track of the employability of its graduates.

# **Graduate tracking on national level**

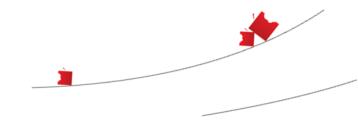

# **Graduate tracking on HE level**

Initiatives in order to make a stronger liaison between education and the labor market

Creation of national information system that would include data on employment of graduates

Collecting data on employment of graduates in a period of 1,
3 and 5 years after completed studies

# **Data collection**

- □ Satisfaction with studies
- Time needed to find employment
- □ Satisfaction with the first working place
- □ Place of employment (RH and abroad)
- In a profession or not
- Satisfaction with income

# What to do with the data ?

□ Interpretation of data by experts necessary

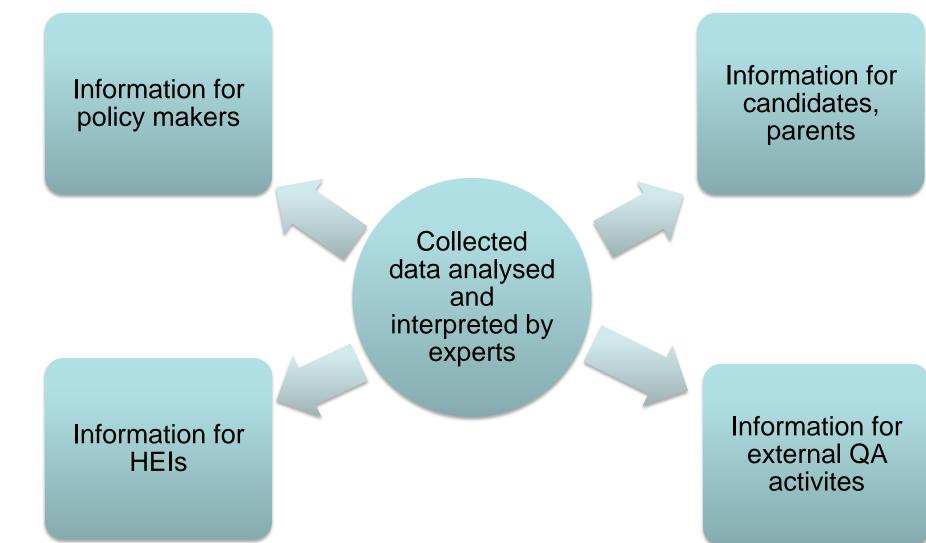

Data analysis at the national level – information for policy makers

Data analysis at the level of study programme - information for HEIs

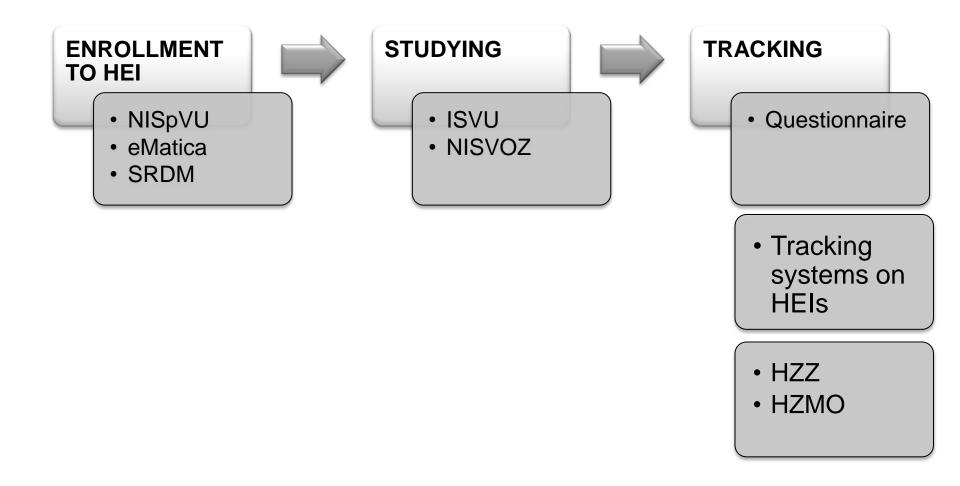

Publishing data on the web page for the application of study programmes – information for candidates when enrolling study programmes

## Aims

# How to obtain data?

# **Collecting data - questionnaire**

Direct collecting of data from graduates via their contacts that already exist in NISpVU System

If HEI already has a tracking system of its graduates all necessary data would be transferred into the national system

Of all students that got enrolled to a certain level of higher education in any Croatian HEI regardless of the fact whether they finished it or not

# Why Agency for Science and Higher Education?

# **Q**A

□ Accreditation

□ Reaccreditation

□ Applications for enrollment

Thank you for your attention!
